

IET Tribology Tour 2014-15: Bringing Tribology to Life

The science and engineering of friction, lubrication and wear – collectively known as Tribology – is fundamental to energy production, manufacturing, transport, healthcare and many other industries. Tribology underpins and sustains our economic competitiveness, environment and everyday lives.

Come along and find out how Tribology:

- Opens up exciting and powerful paths to new technological solutions
- Improves the sustainability of products and systems
- Benefits the environment
- Increases economic competitiveness
